

Motion put to council on 28 July 2020

Power for People is a campaign for more local, clean energy generation that would benefit local communities.

They are a not-for-profit organisation campaigning for the Local Electricity Bill – that they authored – to become law. The Bill is currently supported by a cross-party group of over 200 MPs including Tewkesbury's own MP Laurence Robertson.

The Bill aims to solve the current problem whereby local renewable energy generators, such as community energy groups, are unable to sell energy that they generate to local people. This is because of the huge setup and running costs involved in doing so.

The Bill would overcome this problem by establishing a Right to Local Supply that would make the costs of selling locally generated clean energy proportionate to the scale of the operation. This would benefit the existing community energy groups across the country and, even more excitingly, create the opportunity for huge growth in such groups and other local clean energy providers.

If the Bill became law it would be excellent news for public authorities that wished to set up their own energy companies to sell locally generated renewable energy to local people, as the set up and running costs involved would be proportionate and thus a fraction of what they are now. The revenues received by such authorities could be ploughed back into local emissions reduction schemes and other local services and facilities.

A full copy of the Bill and the names of the 200+ MPs supporting it can be viewed via the following link

<https://powerforpeople.org.uk/wp-content/uploads/2020/09/Local-Electricity-Bill.pdf>

A copy has also been emailed to all Members of the Council

In light of the above, the Council is asked to:

1. sign up to the campaign www.powerforpeople.org.uk/sign-up and
2. adopt the resolution set out below:

Tewkesbury Borough Council:

- (i) acknowledges that it has made efforts to reduce greenhouse gas emissions and promote renewable energy;
- (ii) recognises that Councils can play a central role in creating sustainable communities, particularly through the provision of locally generated renewable electricity;

(iii) further recognises that:

- a) very large financial setup and running costs involved in selling locally generated renewable electricity to local customers result in it being impossible for local renewable electricity generators to do so,
- b) making these financial costs proportionate to the scale of a renewable electricity supplier's operation would create significant opportunities for Councils and Community Groups to be providers of locally generated renewable electricity directly to local people, businesses and organisations, and
- c) revenues received by Councils that became local renewable electricity providers could be used to help fund local greenhouse gas emissions reduction measures and to help improve local services and facilities;

(iv) in view of the above, the Council supports the Local Electricity Bill, currently supported by a cross-party group of more than 200 MPs, and which, if made law, would make the setup and running costs of selling renewable electricity to local customers proportionate by establishing a Right to Local Supply and will: inform the local media of this decision,

- write to local MPs, asking them to support the Bill, and
- write to the organisers of the campaign for the Bill, Power for People, (at 8 Delancey Passage, Camden, London NW1 7NN or info@powerforpeople.org.uk) expressing its support.
